# Kicking Asphalt to the Curb!!!

#### Woodridge School District 68

**Green Campus Initiatives** 

**Edgewood Elementary School** 

**Goodrich Elementary School** 

John L. Sipley Elementary School

**Meadowview Elementary School** 

William F. Murphy Elementary School

Willow Creek Elementary School

**Thomas Jefferson Junior High School** 

This whole project started with a simple question about pavers...

#### Which led to the following question. Why not rethink asphalt?

5

TEMPERATURE

CARCINOGENS

RUN-OFF

ANNUAL

MAINTENANCE

BANK SCOUR LIFE CYCLE COST VOLATILE ORGANIC

COMPOUND

POLLUTANT LOADS

2015

#### **Objective 1**

![](_page_15_Picture_1.jpeg)

![](_page_15_Picture_2.jpeg)

#### eliminate maintenance issues, hazards, and reduce costs

![](_page_16_Picture_1.jpeg)

replace deteriorating asphalt and concrete with more durable materials – permeable pavers.

![](_page_17_Picture_0.jpeg)

#### **Objective 2**

![](_page_18_Picture_1.jpeg)

![](_page_19_Picture_1.jpeg)

install permeable pavers - everywhere

and rain gardens

#### JOHNESPERY SCHOOL

and more rain gardens

![](_page_21_Picture_2.jpeg)

![](_page_21_Picture_3.jpeg)

![](_page_22_Picture_0.jpeg)

#### **Objective 3**

#### enhance the front entry of each school

install teaching and reading gardens

![](_page_24_Picture_0.jpeg)

![](_page_25_Picture_0.jpeg)

![](_page_26_Picture_0.jpeg)

![](_page_27_Picture_0.jpeg)

# which inspires all ages...

#### Sustainable Results

![](_page_28_Picture_1.jpeg)

2016

![](_page_28_Picture_2.jpeg)

![](_page_28_Picture_3.jpeg)

#### WSD 68 has installed:

Almost 5 acres of Permeable Pavers 10,400 s.f. of Rain Gardens 815 l.f. of Infiltration Trenches 6,000 sf of Native Filter Strips Outdoor Classrooms/Reading Gardens

#### And...

- lowered life cycle costs
- longer service life
- better structural support for vehicles
- reduced runoff by nearly 90%
- increased wildlife habitat
- provided environmental education
- reduced road salt use
- 80% pollutant load removal
- sequesters carbon

![](_page_29_Picture_10.jpeg)

#### **Annual Removal Rates of**

Bod	152	
Cod	2,800	
Tss	15,932	
Lead	5 -	– LBS/YR
Zinc	7	
tn	95	
Тр	11	

Approximately 37.5" of precipitation falls on every acre of the midwest That's equal to nearly 1,000,000 gallons of water per acre per year Of that, almost 90% falls in  $\frac{1}{2}$  inch increments, or less

**Based on 5 acres of permeable pavers, that's almost 5,000,000 gallons of precipitation that does not enter the city system** 

#### Funding

![](_page_31_Picture_1.jpeg)

![](_page_31_Picture_2.jpeg)

![](_page_31_Picture_3.jpeg)

![](_page_31_Picture_4.jpeg)

#### **The Verdict**

#### Lessons Learned

Exclude the use of recycled aggregates from specifications.
Make sure contractors are experienced with permeable pavements.
Public outreach and education.

#### The Verdict

#### CONS

- Direct spill from mansard roof is clogging the pavers below.
- Void filler settlement results in faster clogging; need to keep voids filled.
  - Do Not allow contractor to saw-cut pavers in-place.

Payback on investment, less than seven years...

Priceless...

### The End.
